

**DRAKKAR
INTERNATIONAL**

To achieve a gain efficiency in goods handling, Drakkar International offers unique products and innovative solutions used, in that case, to optimize pharmacy laboratory process.

DK-PILCART Rx

The **DK-PILCART Rx** trolley is specially designs for the blister cards transport. It maximizes the storage of prescription cards and thus reduces their storage space.

Employees in charge of blister cards have direct access to the totality of the blisters on the cart.

With the Pilcart classification method, personalized blister cards are now easy to find.

SPECIFICATIONS:

- Loading capacity of 275 prescription cards per cart
- Including eight metal supports for blister cards
- Dimensions: 590 x 810 x 1650mm (23 x 32 x 65 in.)

The **DK-Pilcart Rx** is made of metal with a wheel base and drawers in polyethylene. With four drawers, eight supports and four swivel wheels, the Pilcart is easy to move and park, for all employees.

The **DK-Pilcart Rx** is the essential complement for all automated production machines for prescription cards.

The **DK-Pilcart Rx** includes eight metal wire supports, whose could hold up the 275 blister cards.

All blister cards are grouped to be efficiently transported.
